

Clam® Wall / Mast Mounting Bracket

SAB-336

PANORAMA ANTENNAS

SAB-336

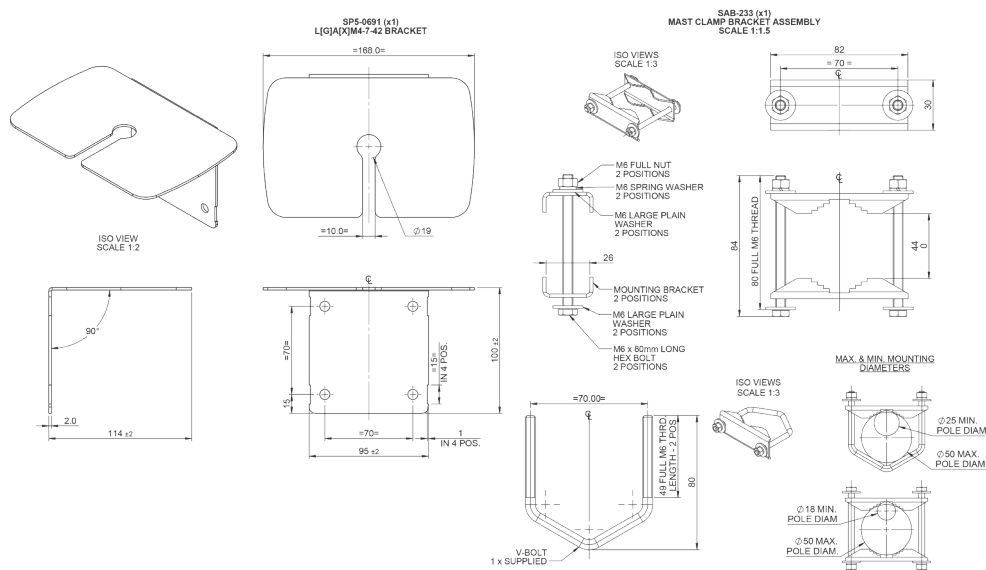

For use with the L[X]A[X]M4-7-42 Clam® antenna series, the SAB-336 is a wall / mast mount bracket solution for fixed site applications.

The robust steel bracket is passivated for corrosion resistance and can be screw mounted to a wall or panel or fixed on a mast using the supplied mast clamps.

SAB-336 is a very easy, simple and quick solution that can permit the L[X]A[X]M4-7-42 Clam® antenna series to be mounted in elevated positions or in locations where a horizontal panel is not available.

When mounting antennas or bracketry above a roofline or in an elevated position in areas prone to lightning it may be prudent to consider lightning or surge protection.

Technical Drawing

Part No.

SAB-336

Mechanical Data

Mounting Options	Wall mount or mast mount
Max Mast Diameter (mm)	50 (1.96")
Length (mm)	168 (6.6")
Width (mm)	114 (4.5")
Height (mm)	100 (3.94")
Screw Fixings	Min. M6 or No.12 with suitable wall anchors (not supplied)
Material	Passivated Steel / Stainless Steel
