

SAB-345

SAB-345

The robust stainless steel bracket can be screw mounted to a wall or panel or fixed on a mast using the supplied mast clamps, this is a very easy, simple and quick solution that can permit L[X]M[X]M8[X]-6-60 and L[X]M[X]M6[X]-6-60 Megalodon® antennas to be mounted in elevated positions or in locations where a horizontal panel is not available.

When mounting antennas or bracketry above a roofline or in an elevated position in areas prone to lightning it may be prudent to consider lightning or surge protection.

Technical Drawing

Part No.

SAB-345

Mechanical Data
